Software and system: Linux/Unix, Windows, AWS, Spark

Working and Research Experience

May.2018 - present, Data Science @Netlify, San Francisco, CA, USA

I built the data science team @Netlify from scratch.

1. Build up and lead a data science team to unlock the optimization for growth and sales enablement (Netlify user has grown 15%+ MoM, revenue has grown 10% MoM)
2. Partner with the infrastructure team to build data pipeline to centralize large scale of user-generated data (Data Lake) in a big data cloud environment using Hadoop and Spark.
3. Design and build Data Mart for business users.
4. Define and lead the development of foundational user behavior analysis

May.2013 - Apr.2018, Data Scientist, DuPont, Johnston, IA, USA

Provide data science leadership for a broad range of analytics in North America Marketing

1. Predictive Analytics
2. Marketing programs analysis under the observational scenario
3. Analyze market research survey data using psychometric models and natural language processing; quantitatively study customer perception and identify variables that are predictive of patterns and/or are leading indicators

Lead the project of building marketing data pipeline

1. Build marketing database in the cloud
2. Automate models and dashboard that track business performance
3. Social media analytics

Jun.2015 - Present, Co-founder, [Central Iowa R User Group](#)

Jun.2012 - Apr.2013, Consultant, Statistical Consulting for Business College, Iowa State University

Sep.2009 - Apr.2013, Statistician, [Production Animal Disease Risk Assessment Program](#)

Aug.2011 - May.2012, Consultant, General University Statistical Consulting and Statistics Consulting for College of Veterinary Medicine, Iowa State University
